

# Let's Start It Over

Atlantic Starr

Girl, I think that you and I should  
Get together and start thing all over again  
I won't be the other guys in your life  
This time it will be for real, you'll see

Love can be somethin' you savor  
Slowly like wine  
You can't explore all of that magic, girl  
All at one time  
Well, I'm just getting to know you  
I'm beginning to show you  
How it feels when someone's not playin' games  
And so forget the other guys who blew it  
They found love and never knew it  
Love will get better if we renew it

Let's start it over  
Keep pressin' me to your heart, baby  
Ooh-ooh-ooh, yeah, baby  
Let's start it over  
I won't love and leave you, baby  
I'd still be here when the night is through

You've found others who called themselves lovers  
But they let you down  
But don't you run and hide  
It's not my intentions, girl, to get you down  
I won't say the words like "trust me"  
'Cause I know how hard it must be  
All I ask is that you don't hold back on me  
I'm here to tell you that I love you  
I can't get enough of you  
Girl, I've got so much more love to give you

Let's start it over  
Love me two time tonight baby, yeah  
Yeah, girl, come on and let's start it over  
While the moon's a nightlight, girl  
Let's do it until we get it right

You thought you dreamed in vain for love  
But, baby, here I am, and here's where I'll stay  
I know, we'll take it all the way  
And, baby, here is where I'll stay, yeah

So turn the lights a little dimmer  
Girl, this time you've got a winner  
We'll feel lots of sweet emotions before the dawn  
You'll soon forget the other guys who hurt you  
I'm not gonna desert you  
Settle back and just let me love you, oh...

Yeah, baby  
Come on  
Let's start it over  
Let's start it over

Let' dim the lights, just hold me tight  
This time we're gonna do it and make it right  
Let's start it over  
Ooh-ooh, girl  
It feels so good to be a man  
I jus want you to understand, I love you  
Let's start it over  
Whoa-oh, I do, baby  
We're one-on-one, love has just begun  
So forget the past and let's make it last, honey  
Let's start it over  
Whoo-ooh, honey  
Let's start it over and keep it tight  
Girl, this time we're gonna make it right, hey  
Yeah, girl

Let's start it over  
Come on, come on, girl  
Let's start it over  
It's gonna be different this time  
Let's start it over  
Me and you, oh...  
Let's start it over  
Come on, baby, yeah, girl  
Let's start it over  
'Cause I just wanna make it happen  
Let's start it over  
You better believe it, oh...
