

Gravity

Audrey Horne

Hold your breath my dear,
As we are floating through the air,
As the engine burns yeah as we all fall down.
See the midnight sky,
See the wing that flies,
Honey we'll be home before you even notice.

Come along, come along.
We're gonna watch it burn.
Come along, come along.

Like a satellite,
With the speed of light,
High above the ground
We fall without a sound.
Still a thousand feet,
To the ground beneath,
I guess gravity is on our side tonight.

Come along, come along.
We're gonna watch it burn.
Come along, come along.

Cause I will always be the one holding on to you.
And I will always be the one who will carry you.
Because you take me home and you sober me up,
you tuck me in til I'm all cried out.
And I will always be the one holding on to you,
Until we hit the ground
