

# Except For Us

Austin Mahone

Up close and personal  
Study your body  
I wanna stay right here  
With your arms around me

Hold you like I do  
Show me all of you, oh  
I'll show you me too

Give it to you like it never been kissed  
Like it never been loved  
Give it to you like it never done this  
Like you've never been touched  
Like nobody else exists, except for us  
Give it to you like it never been loved  
Give it to you like it never been  
Give it to you like it never been, oh  
Give it to you like it never been, oh  
Like nobody else exists, except for us  
Give it to you like it never been loved  
Give it to you like it never been  
Give it to me like it never been

Deeper than physical  
I got you open  
Know how to take you there  
Put you in motion

Hold you like I do  
Show me all of you, oh  
I'll show you me too

Give it to you like it never been kissed  
Like it never been loved  
Give it to you like it never done this  
Like you've never been touched  
Like nobody else exists, except for us  
Give it to you like it never been loved  
Give it to you like it never been  
Give it to me like it never been

There's nobody like you  
There's nobody like you  
There's nobody like you  
There's nobody like you

Give it to you like it never been kissed  
Like it never been loved  
Give it to you like it never done this  
Like you've never been touched  
Like nobody else exists, except for us  
Give it to you like it never been loved  
Give it to you like it never been  
Give it to you like it never been, oh  
Give it to you like it never been, oh  
Like nobody else exists, except for us  
Give it to you like it never been loved

Give it to you like it never been  
Give it to me like it never been
