

That

Autograph

Tell me how I can get lucky
I could use some good advice
Try-in' to get hit by lightning
Is just a waste of time

How's it really supposed to happen
When you finally find someone
I just want to know the answer
Before I'm done

On and on - And all I want is something perfect
On and on - And it all starts with you...

I want that
That thing you got, that no one else can give me
I want that
That feelin' comes from no one else but you
I want that
That destiny, that takes you where it wants you
I want that, I want that

I've been around enough to notice
How good it can feel
When you're failin' in to somethin'
That is somethin' real

On and on - And I just want to get there someday
On and on - And that day starts with you...

I want that
That thing you got, that no one else can give me
I want that
That feelin' comes from no one else but you
I want that
That destiny, that takes you where it wants you
I want that, I want that

I want that
That thing you got, that no one else can give me
I want that
That feelin' comes from no one else but you
I want that
That destiny, that takes you where it wants you
I want that, I want that

I want that
