

Silence in the Age of Apes

Avatar

Cyborg entrails
We build Valhalla out of its dreams
Silicone, copper, and steel
Star-clad circuits
Within these digits, we cease to be
The temple is ready, now kneel

We accelerate
We accelerate
We accelerate
Straight from the core
We accelerate
We accelerate
We accelerate
Never let go

Silence in the age of apes
Silence in the age of apes

Lifeless rebirth
The genocide begins with the trees
Watch as the terminal bleeds
Ciphared sirens
The broken ladder speaks as we peel
We all have to pay for our deeds, let's go!

We accelerate
We accelerate
We accelerate
Straight from the core
We accelerate
We accelerate
We accelerate
Never let go

Silence in the age of apes
Silence in the age of apes

We accelerate
We accelerate
We accelerate
Straight from the core
We accelerate
We accelerate
We accelerate
Never let go

Silence in the age of apes
Silence in the age of apes
