

When All but Force Has Failed

Avatar

Bird carcass with a belly full of plastic
One more year and I'll be millionaire
Fill my dreams with the void of outer space
Don't you dare to show your face
I can't take more of the same

I want bigger better things and want to end it all
I can't let myself go unpunished

When is all hope lost?
Gotta get to battle at all cost
When all but force has failed the strongest
Link will break the chain

Failing lives on a quest for better bargains
One more mile and we'll be in paradise
Name your price for the bodies you have slain
There's a price for every stain
And the currency is pain

I need chaos to ensue 'cause I don't want to wake up
I can't let your crimes go unpunished

When is all hope lost?
Gotta get to battle at all cost
When all but force has failed the strongest
Link will break the chain

Ground up bugs is the color of season
Shit feast grin, we are everything we eat
Mass grave death like an orgy in the snow
Nowhere left to go
We're devoured by the glow

I know monsters aren't real but I know what I've done
I want to tell you all I'm sorry

When is all hope lost?
Gotta get to battle at all cost
When all but force has failed the strongest
Link will break the chain
