

Heroes and Legends

Axe

Roll the dice - lose again
As dark a night as there's ever been
A knife that cuts - wound won't mend
A bird that flies on an evil wind

Choices made - damage done
Scales of life out of balance
To pay the debt, we drink our fate
From this broken chalice

Hear the music in the darkness
See the light that's burning still
Calling out your name to take away the pain
It will

When the world just wants to fight you
And the winner's gonna get your soul
There's a rock down deep inside you
Grab on and let it roll

Heroes tall and legends made
We put them high on an altar
But heroes fall and legends fade
When they can't walk on the water

When it seems like all you're buyin'
Is a ticket on a runaway train
Listen to your heart
Let the music start to break the chain

When the world just wants to fight you
And the winner's gonna get your soul
There's a rock down deep inside you
Grab on and let it roll

Hear the music in the darkness
See the light that's burning still
Calling out your name to take away the pain
It will

When the world just wants to fight you
And the winner's gonna get your soul
You got a rock down deep inside you
Grab on and let it roll

When the world just wants to fight you
And the winner's gonna get your soul
You got a rock down deep inside you
Grab on (grab on) and let it roll

When the world just wants to fight you
And the winner's gonna get your soul
You got a rock down deep inside you
Grab on and let it roll
