

Hello you little girl  
What is wrong with your world?  
Let me hold you my dear

Don't be scared cos' I know  
All the bad dreams will go  
I will drive away your fear

Hello you, little girl, I'm always by your side  
Come close - close to me in this night

All the witches and elves  
I have seen by my self  
... A long time ago

Some are good, some are bad  
You don't have to feel sad  
'Cos I'm always with you

You must know - every time - there's somebody at your side  
There's someone - taking care - day and night

You've got an angel right beside you  
Your helping hand - from heaven send  
You've got an angel - always invisible  
No more tears - it's hurting me, my dear - my child in fear

Don't be afraid now,  
Don't feel sad now  
'Cos I know all the bad dreams fade away  
You've got an angel right beside you  
Your helping hand - from heaven sent  
There is an angel - always invisible  
No more tears - it's hurting me, my dear - my child in fear
