

Learn To Trust

Bad Suns

Can I hold it down? Have I been trying my best?
Eternal questions always asking, feeling distressed, oh
I've been ticking more than time, a selfish man
You're a casualty I can't forget, so come on and let me know

A heart glows in the night, in the day hearts turn to dust
Say it like you mean it, so this heart learns to trust

Can I change my ways? Can I confront the past?
Eternal questions always asking, failing the test, oh
I've been ticking more than time, a selfish man
You're a casualty I can't forget, so come on and let me know

A heart glows in the night, in the day hearts turn to dust
Say it like you mean it, so this heart learns to trust
And the truth it makes no sense, my senses don't ring true
I'm feeling the pressure distorting you

Tell me one more time, why should I listen?
Tell me one more time, the words all go missing

Hold it down, have I been trying my best?
Eternal questions always asking, feeling distressed, oh

So come on and let me know

A heart glows in the night, in the day hearts turn to dust
Say it like you mean it, so this heart learns to trust
And the truth it makes no sense, my senses don't ring true
I'm feeling the pressure distorting you

A heart glows in the night, in the day hearts turn to dust
Say it like you mean it, so this heart learns to trust
A heart glows in the night, in the day hearts turn to dust
Say it like you mean it, so this heart learns to trust
