

Come On

Badfinger

Many times you've never known the way it feels
Many times you never let it show
All the people all around never telling nobody
All the people all around never telling a soul

So, come on, let me hold you tight
So, come on, be with you all night
So come on, let me hold you, hold you
Come on

Many times we've been so out of tune with it
Many times we've never known the way
All the people all around never telling nobody
All the people all around never telling a soul

So, come on, let me hold you tight
So, come on, be with you all night
So come on, let me hold you, hold you
Come on

Show me your magic and our love will be around
Now that it's just we two, don't you let me die

Many times we've been so out of tune with it
Many times we've never let it show
All the people all around never telling nobody
All the people all around never telling a soul

So, come on, let me hold you tight
So, come on, be with you all night, so come on
Let me hold you, hold you, come on
Let me hold you tight, so, come on
Be with you all night, so come on
Let me hold you, hold you, come on
Let me hold you, hold you, come on
Let me hold you, hold you, come on!
