

I Love You, You Love Me

Banaroo

I love you, you love me
That's the way it should be
Take my hand, Come with me
I love you and you love me

What if I would ask you
To be my little girlfriend for tonight
Believe it, you can trust me
I feel that ev'rything will be alright (alright)

What if you would ask me
To be my little boyfriend for tonight
I would be afraid of
Losin' all the things that could be mine (could be mine)

I love you, you love me
That's the way it should be
Take my hand, Come with me
I love you and you love me

What if I would ask you
To be my little girlfriend for tonight (tonight)
Believe it, you can trust me
I feel that ev'rything will be alright

What if you would ask me
To be my little boyfriend for tonight (for tonight)
I would be afraid of
Losin' all the things that could be mine

I love you, you love me
That's the way it should be
Take my hand, Come with me
I love you and you love me

You say that you need me
Like no one else before
And I can tell you something
There's nothing I want more

I love you, you love me
That's the way it should be
Take my hand, Come with me
I love you and you love me

And you love me
And you love me
And you love me
And you love me
