

I Saw It

Barenaked Ladies

I saw
I saw it
We all did
It hurt
I heard it
We all hid

You took what we all hide
We all hide from
The hooks went right inside
That's where they hung

In the park
By the playground
I won't let you down
In the park
By the playground
I won't let you

You weighed and waited
You kept steady
You'd count, and recount it
Now you're ready

You took what we all hide
We all hide from
The hooks went right inside
Then the feeling numbs

I won't let you down
In the park
By the playground
From this point on
I won't let you down

You say you deserve it
I won't stand and observe it
From this point on
We won't allow this, brother
If we don't end this now
There'll be others

I won't let you down
In the park
By the playground
From this point on
I won't let you down
In the park
By the playground
From this point on
I won't let you down
In the park
By the playground
From this point on
I won't let you down
In the park
By the playground

From this point on
I won't let you down
In the park
By the playground
From this point on
I won't let you down
In the park
By the playground
From this point on
I won't let you down
In the park
By the playground
From this point on
