I Saw It

Barenaked Ladies

I saw I saw it
We all did
It hurt
I heard it
We all hid

You took what we all hide We all hide from The hooks went right inside That's where they hung

In the park
By the playground
I won't let you down
In the park
By the playground
I won't let you

You weighed and waited You kept steady You'd count, and recount it Now you're ready

You took what we all hide We all hide from The hooks went right inside Then the feeling numbs

I won't let you down
In the park
By the playground
From this point on
I won't let you down

You say you deserve it I won't stand and observe it From this point on We won't allow this, brother If we don't end this now There'll be others

I won't let you down
In the park
By the playground
From this point on
I won't let you down
In the park
By the playground
From this point on
I won't let you down
In the park
By the playground
From this point on
I the park
By the playground
From this point on
I won't let you down
In the park
By the playground
By the playground

From this point on
I won't let you down
In the park
By the playground
From this point on
I won't let you down
In the park
By the playground
From this point on
I won't let you down
In the park
By the playground
From this point on
I the park
By the playground
From this point on
