

Out of This World

Basic Element

Then you know where to go
And then you know where to go

I didn't know who I wanted to be
I didn't know how my love would turn out, you see
But then I know if I look into your eyes
I finally found who I am and how I'm feeling inside

I do everything, everything, everything...
I do anything for you
And you should just know what's on my mind

refrain:
You came to my world
You are my world
You know that if you let me
I will lead your way
Out of my world I know that
You'll always need me
I'll give light on your way

And then you know where to go, where to go, where to go... (2x)

You better know all the obstructions of life
You better know, that it ain't what it seems in spite
For what it's worth, I'm guiding your way
You wanna learn, 'cause I know how to save
That's why

I do everything, everything, everything...
I do anything for you
And you should just know what's on my mind

refrain

And then you know where to go, where to go, where to go... (4x)

I do everything, everything, everything...
I do anything for you
And you should just know what's on my mind

refrain

And then you know where to go, where to go, where to go... (2x)
