

# Lost in Wars

## Battle Beast

We can be your new best friend  
Or make you suffer 'till the end  
You will bleed for our greed  
We are masters of disaster

How can the stars glow  
Above this creepy show  
Which lie to chose  
To believe and use

We feed the fear

The sun as gone  
A long time ago  
We're waiting for the dawn  
That will never show  
Our hearts are getting hard  
Souls covered by scars  
We are made of stars  
But we are lost in wars

Lost in wars

We're the ones you never see  
Spilling blood but staying clean  
Committing crimes but walking free  
'Cause we own those who make the law

Stolen yesterdays  
Tomorrows drift away  
No dreams to dream  
The nightmare became real

Screams in the night  
My dark lullaby  
No melody  
Repeating endlessly

We feed the fear

The sun as gone  
A long time ago  
We're waiting for the dawn  
That will never show  
Our hearts are getting hard  
Souls covered by scars  
We are made of stars  
But we are lost in wars

We take away your right to speak  
We take away your voice  
This game ain't no hide and seek  
You don't have a choice

Hungry machine keeps on turning  
Doing crimes that won't get cold  
We're burning down our future

Turning Gaia into gold

The sun as gone  
A long time ago  
We're waiting for the dawn  
That will never show  
Our hearts are getting hard  
Souls covered by scars  
We are made of stars  
But we are lost in wars
