

Uncivil War

BBMak

I'm so tired
Aren't you tired
We've got bruises that cover our scars
From the words we don't mean
Cause we're too scared to be who we are

So put down all your guns
Cause I'm calling a truce right now

I'm naked no armour
I'm here with no guard up
So can't you just call off your dogs
And I'm scaling barbed wire
And begging ceasefire
And waving white flags through the fog
Doesn't matter who's right or wrong
This uncivil war's gone too long

My mistakes
Your mistakes
Now it's time that we forgive it all
If you need
I will be
Be the first one to take down my walls

So put down all your guns
Cause I'm calling a truce right now

I'm naked no armour
I'm here with no guard up
So can't you just call off your dogs
And I'm scaling barbed wire
And begging ceasefire
And waving white flags through the fog
Doesn't matter who's right or wrong
This uncivil war's gone too long

When I say I don't love you I'm a liar
Don't mean to take you out with my friendly fire
We're the walking wounded with desire
Baby aren't you getting tired

I'm naked no armour
I'm here with no guard up
So can't you just call off your dogs
And I'm scaling barbed wire
And begging ceasefire
And waving white flags through the fog
I'm naked no armour
I'm here with no guard up
So can't you just call off your dogs
And I'm scaling barbed wire
And begging cease fire
And waving white flags through the fog
Doesn't matter who's right or wrong
This uncivil war's gone too long
Doesn't matter who's right or wrong

This uncivil war's gone too long
This uncivil war's gone too long
