Now here we are together
This would've been worth waiting forever
I always it'd feel this way

And please forgive my shaking Can't you tell my heart is breaking? Can't make myself say what I planned to say

## Baby

Please let me wonder
If I've been the one you love
Please let me wonder
If I'm who you're dreaming of
Please let me wonder, love

I built all my goals around you That some day my love would surround you You'll never know what we've been through

For so long I thought about it
And now I just can't live without it
This beautiful image I have of you

## Baby

Please let me wonder
If I've been the one you love
Please let me wonder
If I'm who you're dreaming of
Please let me wonder, love

Please let me wonder
If I've been the one you love
Please let me wonder
If I'm who you're dreaming of
Please let me wonder, love

I love you
