Well back in time with just a rhythm and rhyme Gregorian chants were a real big thing They took that chant and added harmony It was a different sound But had the same meaning

I know (I know) I know (I know)
It took us a long while
To go (to go) to go (to go)
And find us a rock style
I know (I know) I know (I know)
That we can take it one more mile

Because

We're singing that same song
We're still singing that same song
We're singing that same song
That same song
That same song

The rock of ages
Built that rockin' sound
'Til more and more people start to come around
They worshipped in church
And built that great big choir
It grew and it grew
Until it spread like fire

I know (I know) I know (I know)
It took us a long while
To go (to go) to go (to go)
And find us a rock style
I know (I know) I know (I know)
That we can take it one more mile

Because

We're singing that same song We're still singing that same song We're singing that same song That same song That same song

Same song
Oh yeah
Same song
Oh yeah
Same song that same song

Same song
Oh yeah
Same song
Oh yeah
Same song that same song
