

# Fuel on the Fire - Fragments

Bear's Den

I can't find you  
I wouldn't even know where to look  
Said to meet you back here, someday  
Things change

Was it all in my mind?  
Was I lost in my own head?  
Worried about something I regret  
Is there anything I don't regret?

It's not just the memory of you  
It's all that comes with you  
As the images start to stutter and skip  
Disintegrating into sparks that glitch

There's a daemon in the server  
And history's we cannot erase  
You're so close and so far away  
You're so close now

Fuel on the fire, I can't get enough  
Fuel on the fire, now I'm burning up  
Fuel on the fire, I won't ever stop  
Fuel on the fire, remembering how to love

Remembering how to love  
Remembering how to love

I can't help it  
I only wish that I could  
Always hoped you'd come back here someday  
Things change

Was it all in my mind?  
Was I lost in my own head  
Worrying about something I should have said  
You're the only thing I won't regret

Fuel on the fire, I can't get enough  
Fuel on the fire, now I'm burning up  
Fuel on the fire, I won't let it stop  
Fuel on the fire, remembering how to love

Fuel on the fire, I can't get enough  
Fuel on the fire, now I'm burning up  
Fuel on the fire, I won't let it stop  
Fuel on the fire, remembering how to love

Remembering how to love  
Remembering how to love

Remembering how to love
