

Love Can't Stand Alone

Bear's Den

I remember the night you lost to me
All of the fires still burn within
You started choking down vitamins
If I mentioned his name I was sent to bed
You check if I'd gone to sleep
And I closed my eyes and heard you leave
I pray for the day my prayers will mend
But nothing ever came that was heaven sent

Driving in your car you said you had the thought
Gonna call it all and write it off [?]
You sat there and cried 'til the morning come
And what you said don't you ever think I forgot

I'll never leave you out in the cold
I'll never leave you out in the cold
I'll never leave you out in the cold
Love can't stand alone
Love can't stand...

I think of him from time to time
Just what it is he left behind
His life alone I'll always remind
We've all the things we have to look to find
Of the strength we both had to find
Of the strength we both had to find
That's all that he's left behind
That's all that he's left behind

Driving in your car you said you had the thought
Gonna call it all and write it off [?]
You sat there and cried 'til the morning come
And what you said don't you ever think I forgot

I'll never leave you out in the cold
I'll never leave you out in the cold
I'll never leave you out in the cold
Love can't stand alone
Love can't stand alone
Love can't stand alone
Love won't stand alone
