

It's Dark Inside with You

Before Their Eyes

In the deepest parts
Of the human heart that's where I play
A piece of art and when I'm done
Well I can't be held responsible
Take a look at me now
Standing oh so tall and proud
When you know that inside
I must be feeling miserable

Take a look
At me now
Turn around before you forget your way out

Take yourself
Far away
Take yourself
Far from me
And go to sleep with the lights on

I'm the charm you need
But I always leave
You just don't know what to believe
I've always got all my mistakes
Right there in front of me
It's in everything
Oh you don't believe
Well then take a look at me
Watch me grind words through my teeth
As I try to sing in key

And I'm not worth it

Take yourself
Far away
Take yourself
Far from me
And go to sleep with the lights on

I love the look in your eye
When you beat your wrists
The sounds it makes
When your heels they click
You know, you know
Just how to get my...
On an modest night
With our thick eyesight
We spoke of heaven
Made out quick
Like a thief in my sight
I saw you
You tried to get in my...head

Before you take a step
My way
I want you to know
That you need to go back where you came from
Seriously

GET OUT!
