

# **We Destroyed All the Evidence**

## **Before Their Eyes**

Fall away from the voices that they bring  
From the feelings that this is all is just  
A temporary thing

And I've written down my thoughts, I think  
I've tried to catch them before they shrink  
Into the things that explain  
What is even going on  
I've found other ways, I'm moving on  
Hooded nights and the light from the moon  
Will lead the way

We destroyed all the evidence  
Should have seen this coming, predicted it  
If your name was on it  
Lies don't stay true for too long  
We destroyed all the evidence  
Cause we heard em coming prevented it  
If your name was on it  
Oh, we torched it on our lawns

Soaked rags and gasoline  
Karma's coming you know what I mean  
Then you will feel  
Nothing, at all

Now we sing to you on the best of nights  
Midwestern sun lead by candlelight  
We're not sure if we are  
The ones who determined  
What we are, all we know  
Is that we can't give up
