

The Resilient

Betraying the Martyrs

An assembly of atoms so tight, spectrum of colours so bright
We break the limits, we've felt the ground
Now we touch the sky
Unbreakable - an assembly of atoms so tight
Unbreakable - trembling energy, with fire and light

You may bend us, but will not break us
Resistant - persistent
You cannot end us, you will not take us
We are the resilient

They try to break us down, but we stand strong
We take the fall, we take the impact
They'll never break us down, now we stand strong
Absorb the force, we bounce right back

War

We were built for destruction, the facts don't lie
We were built for destruction
Drop us from the highest heights just to watch us fall
Climbing 'til the day we die
If we fall down we bounce right back again
We were built for destruction, the facts don't lie
We were built for destruction

They try to break us down, but we stand strong
We take the fall, we take the impact
They'll never break us down, now we stand strong
Absorb the force, we bounce right back

We were built for destruction

They try to break us down, but we stand strong
They'll never break us down, now we stand strong

They try to break us down, but we stand strong
We take the fall, we take the impact
They'll never break us down, now we stand strong
Absorb the force, we bounce right back
