

Between You & Me

Betty Who

It's too crowded in this bar
We've been small-talking so far
I can't tell if we're friends
You sure like to make fun of my ex
But we never get past this part

Don't wanna give myself away
'Cause I'm trying so hard not to say, say

Just between you and me
I can feel something here, wondering if you do, too
Just between you and me
Can't help but feeling we're acting like lovers do

Why can't we just address it?
Why don't we start undressin'?
'Til there's nothing between
Nothing between, nothing between
Nothing between you and me

You've got one hand on the wheel
Slide the other over, make it real
Sitting at the red light, tensions are high
Vibe you could cut with a knife
Baby, tell me how you feel

Come on and give yourself away
'Cause all I want is you to say, say

Just between you and me
I can feel something here, wondering if you do, too
Just between you and me
Can't help but feeling we're acting like lovers do

Why can't we just address it?
Why don't we start undressin'?
'Til there's nothing between
Nothing between, nothing between
Nothing between you and me
'Til there's nothing between
Nothing between, nothing between
Nothing between you and me

Ah, nothing between you and me
Ah, nothing between you and me

Why can't we just address it?
Why don't we start undressin'?
'Til there's nothing between
Nothing between, nothing between
Nothing between you and me

Inch by inch, you're coming
Closer into me

Just between you and me
I can feel something here, wondering if you do, too

Just between you and me
Can't help but feeling we're acting like lovers do

Why can't we just address it?
Why don't we start undressin'?
'Til there's nothing between
Nothing between, nothing between
Nothing between you and me

Just between you and me
I can feel something here, wondering if you do, too
Just between you and me
Can't help but feeling we're acting like lovers do

Why can't we just address it?
Why don't we start undressin'?
'Til there's nothing between
Nothing between, nothing between
Nothing between you and me

'Til there's nothing between
Nothing between, nothing between
Nothing between you and me
