

# Heartbreak Dream

Betty Who

It's you and me  
It's slow dancing to anything playing  
It's us colliding  
It's never finding when we should say when

I-I-I can feel it  
When I look in your eyes so clearly  
I-I can see that you need me  
And all that we was  
I-I can taste it  
All the days that you've been wasting  
I know that you can't face them  
And all that we were

In a moment  
You were everything to me  
In this moment  
We're living in a heartbreak dream

We're living in a heartbreak dream

It's holding hands  
It's making plans that we never keeping  
It's silent driving  
It's always finding reasons to sleep in

Ah, ah, can you hear me?  
I'm yelling and you can't hear me  
Can you feel me, and all that we were?  
I-I can taste it  
All the days that we've been wasting  
I-I know that you can't face them  
And all that we were

We're living in a heartbreak dream  
We're living in a heartbreak dream

When you hold me it feels like you don't know me  
We are worlds apart  
When you kiss me I know you haven't missed me  
You keep breaking my heart (3x)

We're living in a heartbreak dream  
We're living in a heartbreak dream
