

She Doesn't Need Saving

Beverley Craven

It's easier here on the outside
Telling her what we'd do
If fate put us in her position
If we were stood in her shoes

But destiny's already written
And she has to learn to survive
So leave her to make those decisions
And take back control of her life

She doesn't need saving
She's not given up yet
All she needs is our faith
To replace her regret
And help her forget

So give her some time to grow stronger
And let her decide what to do
She's been through so many changes
And right now she's still confused
But when she's discovered the answers
And she doesn't feel so afraid
She'll have the power of wisdom
And no one can take that away

She doesn't need saving
She's not given up yet
All she needs is our faith
To replace her regret
And help her forget
The past and the pain
And try to start over again
'Cos she knows
Where she wants to go
So leave her alone
And trust her to find her own way

She doesn't need saving
She's not given up yet
All she needs is our faith
To replace her regret
And help her forget
