

Hieroglyphics

Beware of Darkness

Talking to you is reading hieroglyphics
So baby keep me in the dark
Face to face she couldn't tell me how she felt
So online she led a witch hunt

Hold my hand as the universe tries to pull us apart
You'll never love me as much as I love you

Only in this world, could I be broken by the girl,
Who said I'm never, never, never, never gonna leave you
Only in this life, could I be eaten half alive,
In a digital world she broke my analog heart
Never again, no, no, never again
Save me!

Where files are stored, she kept my heart
Zipped in bits behind firewalls
But she hacked right through and gave me a virus
I never knew how naked I was, I never thought that I could lose

Hold my hand as the universe tries to pull us apart
You'll never love me as much as I love you

Only in this world, could I broken by the girl,
Who said I'm never, never, never, never gonna leave you
Only in this life, could I eaten half alive,
In a digital world she broke my analog heart
Never again, no, no, never again

Only in this world, could I be broken by the girl!
