

The Only One

Bif Naked

I'm kissing you, like a butterfly
In my dreams, as you sleep every single night
We are as broken as two people could ever be
But I am here for you and you're here for me

You are the only one, you are my number one
And I want to keep you for life
The February sun, when things are said and done
It's just you and me for life
You are the only one, the only one for me

I carry you and your heavy chains
Throw away all your fear, let me take your pain
We are as broken as two people could ever be
But I am good for you, you're so good for me

You are the only one, you are my number one
And I want to keep you for life
The February sun, when things are said and done
It's just you and me for life
You are the only one, the only one for me
You are the only one, the only one I need

Ready to run for our lives, ready for anything at all
Together we're gonna make it, we can make it

You are the only one, you are my number one
And I want to keep you for life
The February sun, when things are said and done
It's just you and me for life

You are the only one, you are my number one
And I want to keep you for life
The February sun, when things are said and done
It's just you and me for life
You are the only one, the only one for me
You are the only one, the only one I need

I'm kissing you, like a butterfly
