

And it's you that's on my computer screen
Cause it's you that's on my mind
And it's you that's on my computer screen
Cause it's you that's on my mind
Cause it's you that's on my mind

The world is yours, well did you log on?
I'm long gone like the drow that's blown in the wind
Friend pretend that this life is but a dream then reality sinks in
The fantasy begins and it never ends
We like to role play, throw on some Coldplay
Go get some drugs and alcohol, for cup a whole day
Now we trapped in the Matrix
My big brother ouchea making moves
Nigga don't take shit

It's you that's on my computer screen
Cause it's you that's on my mind
And it's you that's on my computer screen
Cause it's you that's on my mind
Cause it's you that's on my mind

The elevation age
The age of information but we're still enslaved
So let me behave like a goon, bring them goons out in CL though
That's what they shuvin down our throats so I choke
And regurgitate the truest quotes I ever wrote, folk
My crew is bloaked out without the bandana
Yet we keep it crackin like an egg yolk, nigga that's Atlanta
(The way you work the banner, get here)

It's you that's on my computer screen
Cause it's you that's on my mind
And it's you that's on my computer screen
Cause it's you that's on my mind
Cause it's you that's on my mind

As I scroll through the centerfold
Wishing that this thing was 3dimensional
I know it doesn't seem too conventional
But it'll do until I get you in the physical

As I scroll through the centerfold
Wishing that this thing was 3dimensional
I know it doesn't seem too conventional
But it'll do until I get you in the physical

It's you that's on my computer screen
Cause it's you that's on my mind
And it's you that's on my computer screen
Cause it's you that's on my mind
Cause it's you that's on my mind

The flash memory that I hold
Is all I know of time
I was waiting all along
Is all I have to revive

Of Catherine trial school
The girl that's waited and years went on along

It's you that's on my computer screen
Cause it's you that's on my mind
And it's you that's on my computer screen
Cause it's you that's on my mind
Cause it's you that's on my mind
