

# I Came to Git Down

Big & Rich

We got Detroit diesels are burning  
And a couple hundred good years are turning  
Got a convoy hellbound headed to your hometown  
Fueling up on smoking crown

All them girls lined up in bikinis  
And sipping on their noon time martinis  
If you wanna party with the band get a stamp on your hand  
But you better shake it just like you mean it

You know I come to git down  
Right here in your party town  
Play some country rock and roll  
Stomp a big mud hole  
Get 20,000 people spinning out of control  
I come to git down  
Oh I come to git down

I see tailgating boys that are joking  
And the girls are already smoking  
So hold up your lighters  
I go walking cross the fire  
And take this round a little bit higher

You know I come to git down  
Right here in your party town  
Play some country rock and roll  
Stomp a big mud hole  
Get 20,000 people spinning out of control  
I come to git down

Say hey hey hey yeah  
Say hey hey hey yeah  
I said hey little lady now what you think maybe  
Tell us baby what's your name  
If you wanna feel the heat then come up here with me  
And baby watch my guitar play

I come to git down  
Right here in your party town  
Play some country rock and roll  
Stomp a big mud hole  
Get 20,000 people spinning out of control  
I come to git down  
Yes I come to git down  
Oh I come to git down  
Yes I come to git down

Oh I come to git down
