

Knee Deep

Big Wreck

Make love by the window
With the toffs
And before you can jump
I'll push you off
And I'm knee deep with no sleep at all
When you're on my shoulder
I'm knee deep and I can't sleep it off

Clench my fists
Bite my lip
'Til it goes away
And all this blood
And all these days
Dry up and blow away

Look over yonder in my past
Where everything good will always pass
And I'm knee deep with no sense at all
When you're on my shoulder
I'm knee deep and I can't kiss it off

Clench my fists
Bite my lip
'Til it goes away
Madness comes
And always does
And always finds a way

Sadness comes
And always finds a way

Understand
Reprimand
When you're on my shoulder
But you'll always fly
Always fly away
Ya away

Clench my fists
Bite my lip
'Til it kills the pain
And all this blood
All these days
Dry up and blow away

All my past
All my hate
Always finds a way

Always finds
