

Star Now

Bilal

You took the rain
She closed her eyes and called his name
The oceans crashed, the thunder came
She fell into his arms
A virgin's tears rode from her eyes
But all he could think about was pussy

It was made for you
It was made for you
It was made for you

Star now
You shine like a star now
Your skin will glow like a star now
Your eyes will glitter like a star now
Your friends all know you're a star now
You have a smile like a star now
Show the world your stars now
Oh to shine forever more
