

Song About Us

Black Buddafly

Baby it's been 16 days since I saw you
And I missed you today.
I know it might be wrong that I've been
Counting but I couldn't help it
I got a feeling that you and I
Should try to take it serious
Cause boy I can't lie,
Got a crush and don't want to fight it
I'm on it for real so come meet
Me tonight out at the club.
So we can relax and chill said
I wasn't but I will go after what
I like

(Can't you hear it?)
The sound of the drum calling for you and me to fight
(Boy I need it)
And you are the one that I want to show me a good time
That's why...

We tell the DJ turn it up
Make him put on repeat
Make it never stop
Play it over again
Spin it all night long cause
We love it when he plays
The song about us
Song about us (8x)

Don't be shy and make your way right
Over here, the disco lights hit your
Face and I see that you're smiling
I'm feeling so good as you enter
Into my atmosphere now I need is one
Touch come make me rock cause
My favorite part is coming up
Coming up

(Can't you hear it?)
The heart of the bass hitting high and hitting low
(Boy I need it)
One little taste of you just let all go
And we will...

We tell the DJ turn it up
Make him put on repeat
Make it never stop
Play it over again
Spin it all night long cause
We love it when he plays
The song about us
Song about us (8x)

Play my favorite song DJ and put it on repeat I said
Play my favorite song DJ and put it on repeat for me (2x)
I wanna hear it again
Again... play my favorite

Again... play my favorite
Again... play my favorite
Again I want it
Again
Again
Again
And again
And again

We tell the DJ turn it up
Make him put on repeat
Make it never stop
Play it over again
Spin it all night long cause
We love it when he plays
The song about us
Song about us (8x)
(Play my favorite song DJ and put it on repeat I said
Play my favorite song DJ and put it on repeat for me (2x)
Song About Us!
