You smoked all my dope, chased a rainbow, and then you sang a song  
You drank all our beers, picked some flowers and things were going strong  
You tripped all our blotter and went out for a ride  
Now settle down and have some children 'cause your brain is fried

Don't you mess up my baby  
Don't you mess up my baby

Take a puff of meth-amphetamines, eating TV dinner on my slip and slide  
Take Dr. Pepper and nicorette, foaming the carbon dioxide  
Time lapsed rock and nanny pills trolling on our lives  
Now settle down and have some children because your brain is fried

Don't you mess up my baby

You huffed on my clank drank with Kool Aid when your drug was dry  
You pucked all my chill chill pills when you thought you're gonna die  
You ate my Captain Crunch, chase the dragon, went to hide  
Now settle down and have my children because your brain is fried

Don't you mess up my baby
