## Navajo

I fell in love with a little Indian girl And she stole my heart away She took me to a pow-wow way out on the plains And runs with bears, danced and brought the rains I listened to the stories all through the night Through the haze of that peace pipe The night grew long so i found a tee pee And you can bet I brought that squall girl with me

Could be Cherokee, Inuit, Etowah, Navajo, Sioux, Creek, Apache, Seminole bravo Tomahawk, arrow, any way the wind blow It's just fine with me Buffalo, wolfpack, rawhide knapsack Arrowhead, mohawk, other tribe to attack Take my wife back to that land with me All I gotta do is take that love to the floor After all, I liked the way you were before
