

# Never Surrender

Black Stone Cherry

Rise up resist, let me know you feel this  
Take back all that we've missed and get to livin' again  
Broken and beat, one love is all we need  
Mountains are getting steep it's time the reaping begins

Here and now and ever after  
All the stars are falling faster

Stand up and take a chance  
Under the circumstance  
I wanna make this contagious  
Light up the darkest minds  
Let's let our scars align  
Because you know that's what made us  
Be the defender, never surrender

Up and away, go the words that you say  
Burning their wicked flame and now it's pulling us in  
Out in the cold, into the great unknown  
Now the story's been told this time we ain't givin' in

Stay or leave we've found our reason  
I had a dream now I'm believin'

Stand up and take a chance  
Under the circumstance  
I wanna make this contagious  
Light up the darkest minds  
Let's let our scars align  
Because you know that's what made us  
Be the defender, never surrender

Stand up and take a chance  
Under the circumstance  
I wanna make this contagious  
Light up the darkest minds  
Let's let our scars align  
Because you know that's what made us

Stand up and take a chance  
Under the circumstance  
I wanna make this contagious  
Light up the darkest minds  
Let's let our scars align  
Because you know that's what made us  
Be the defender, never surrender
