

Good Liar

Black

What kind of promises were you hoping for
When you chewed me out but still wanted more...
And you pulled me close and whispered
That before you can start
You must open your heart
And let the sky into you
Let it flow through you
I love you
I have loved you from the start
Don't let it come in between us

I am alive
When I am in love

The play of midnight shows you lie
Back gasping
With a necklace of stars
While my guitar weeps a single tear
Hands up.....I raise both my hands up
I'll wave my standard from the rooftop
Of a car
If I'm a liar I'm a good one

I am alive
When I am in love
