

After the Storm

Bloodsucking Zombies from Outer Space

Six point five billion gone with a bang
We knew the day was coming, how it's gone and went
We headed for inferno, faster, faster 'til the end
We got locked out by our own apocalypse
The golden age after 20th century
Got blown away by our bad [?]

[Chorus]

After the storm
The world was cleansed by fire
After the storm
Just pickings, no survivors
After the storm, not long that night
Human life extinct, got blown away
With our beta waves
Social order decayed along with it
A ghastly epidemic swept over the lands
Laws of nature regressed without a care
But this time man won't be the end of that chain
Blacked-out cities in ruins and in ash
Welcome back to a modern day stone age

[Chorus]

After the storm

The world was cleansed by fire
After the storm
Just pickings, no survivors
After the storm, not long that night
Human life extinct, got blown away
With our beta waves
The storm [?] out
The world went silent
Some of us survived
A lot died trying
Left our [?] [?] by the rain
Picked up the pieces to start all over again
Our world full of mutants, zombies, and creeps
Lone wolves, burials, and modern primitives

[Chorus]

After the storm
The world was cleansed by fire
After the storm
Just pickings, no survivors
After the storm, not long that night
Human life extinct, got blown away
With our beta waves
After the storm
After the storm
After the storm
After the storm
