

# Made Your Mind Up

Blue Rodeo

Tell me the way that you want this to go  
I can be hard or I'll melt like the snow coming down  
Everything changes each word that we say  
One little step and you can't find your way back around

Maybe some picture appears in your head  
Knocks you right off of your track  
All the doubts and excuses they flood in instead  
One little step out that door  
You'll never go back

Well you're trying to get out  
You can't find the words  
Leaving the way that you'd always heard  
But you made your mind up  
Yes you made your mind up

Night after night you're back here again  
Tossing and turning like birds in the rain losing ground  
Take away everything gained in a life  
All you could borrow or steal  
No rich man no poor man  
No wrong or no right  
Strips you right back down to nothing  
But the way that you feel

Well you're trying to get out  
You can't find the words  
Leaving the way that you'd always heard  
And you made your mind up  
Yes you made your mind up

Everyone knows that it's easy to leave  
Harder to get out and really believe  
But you made your mind up  
Yes you made your mind up

Ten thousand reasons are scattered around  
As you watch yourself walking away, walking away

Maybe some picture appears in your head  
Knocks you right off of your track  
All the doubts and excuses they flood in instead  
One little step out that door  
You'll never come back

Well you're trying to get out  
You can't find the words  
Leaving the way that you'd always heard  
And you made your mind up  
Yes you made your mind up

Everyone knows that it's easy to leave  
Harder to get out and really believe  
But you made your mind up  
Yes you made your mind up

Climbing the steps with your head hanging down  
You meet yourself walking away, walking away

Tell me the way that you want this to go  
I can be hard or I'll melt like the snow coming down
