

# Keep Believing

Bob Mould

And now the hearts are beating  
And all our sadness has been washed away  
The drug that keeps me breathing  
I stick it in me every day

The needle / The sound  
This groove it goes around

An anthem keeps repeating  
I'm dialing up a song from far away  
And you can't get this feeling anywhere but  
Here, right here, right now

No choice / Can't leave  
I have to keep believing

Bring me thoughts and words, pass me the revolver  
I can see for miles, and everything's in colour  
Rock and roll all night, until I feel the thunder  
I got a handle on some complicated fun

We're all sniffing glue, pleasures so unknown  
A circle drawn in blue, the murmur baritone  
Picnic on a Pedro lawn, heaven took that monkey song  
Never mind the battle won, could you be the loveless one?

Always keep believing  
Have to keep believing  
Never lose that feeling  
Have to keep believing
