

Embrace the Night

Bobby Caldwell

When you say my name
When your lips wrap around
The vowels and sounds
I'm so hypnotized
Each time you say my name

When you're in the room
It's a moment of truth
And even more proof
But somehow our tongues are tied
And we can't get the words out
So if you have the time
If you're inclined to

Embrace the night, maybe you might
Discover someone you've been looking for
Don't let this moment slip away (no don't let slip away)
Embrace the night, while all the stars are shining
All for you and I
Embrace the night

When you're in the room
How you wear your perfume
Like flowers in bloom
The scent of a rose
Beautiful rose on a rainy day
When your eyes meet mine
And my heart skips a beat
My knees will go weak
Cause I search for a common line
But I can't get the words out
So if you have the time
If you're inclined to

Embrace the night, maybe you might
Discover someone you've been looking for
Don't let this moment slip away, (no don't let slip away)
Embrace the night, while all the stars are shining
All for you and I
Embrace the night
