

# She Does It Better

Bobby Caldwell

We don't communicate  
No girl not like before  
I tried but you'd never listen  
The someone set me straight  
She taught me so much more  
I never knew what I was missing

She does it better  
She does it so much better  
And girl I let her  
She does it better

I never did relate  
Let's call the whole thing off  
You've got to see my position  
My blood don't percolate  
No girl not like before  
But now she's changed that condition

She does it better  
She does it so much better  
And girl I let her  
She does it better

I can't forget her  
She does it so much better
