

# Shadows

Bonobo

I thought you'd know what came to pass  
This love is falling down  
But falling leaves hang on for life  
As time is ticking now

I wait and see the fire burn  
It's burning to the ground  
Wake from the dream, without the hurt  
The journey's turning 'round

Save me, save me from the unknown  
While I daydream I leave this world to follow you  
My footsteps are sinking to the hollows  
I can retrace the memories in the shadows

Consider that my time away  
Was working for the soul  
I studied all I had to face  
The fear inside me grows

Save me, save me from the unknown  
While I daydream I leave this world to follow you  
My footsteps are sinking to the hollows  
I can retrace the memories in the shadows

Save me, save me from the unknown  
While I daydream I leave this world to follow you  
My footsteps are sinking to the hollows  
I can retrace the memories in the shadows
