

# A Little Faith

Brandon Heath

I walk your streets  
I hear your voices  
I put my arm around a pain filled world

I see your wars  
I feel your struggle  
I know you wonder if your hope's run out

But you don't need much  
No, it doesn't take a lot  
Yeah, all you need's a touch  
I can work with what you got  
(I can work with what you got)

From a spark to a fire  
From a wave to a hurricane  
Let my love take you higher  
Start it like the morning brakes  
Just a word that's all it takes

A little faith (faith), just a little faith  
A little faith goes a long long way  
A little faith (faith), just a little faith  
A little faith goes a long long way

Bring your pain  
Your disillusion  
Bring your confusion over who is what  
'Cause I got your back  
And I got your answers  
Don't leave me knocking with the door slammed shut

'Cause you don't need much  
No, it doesn't take a lot

Yeah, all you need's a touch  
I can work with what you got  
(I can work with what you got)

From a spark to a fire  
From a wave to a hurricane  
Let my love take you higher  
Start it like the morning brakes  
Just a word that's all it takes

A little faith (faith), just a little faith  
A little faith goes a long long way  
A little faith (faith), just a little faith  
A little faith goes a long long way

You can move, you can move  
You can move any mountain  
Nothing you, you can't do  
You can move any mountain

A little faith, a little faith  
Goes a long long way

A little faith (oh, faith), just a little faith (oh, faith)  
A little faith goes a long long way  
A little faith (oh, faith), just a little faith (oh, faith)  
A little faith goes a long long way  
A little faith, just a little faith  
A little faith goes a long long way
