I walk your streets I hear your voices I put my arm around a pain filled world I see your wars I feel your struggle I know you wonder if your hope's run out But you don't need much No, it doesn't take a lot Yeah, all you need's a touch I can work with what you got (I can work with what you got) From a spark to a fire From a wave to a hurricane Let my love take you higher Start it like the morning brakes Just a word that's all it takes A little faith (faith), just a little faith A little faith goes a long long way A little faith (faith), just a little faith A little faith goes a long long way Bring your pain Your disillusion Bring your confusion over who is what 'Cause I got your back And I got your answers Don't leave me knocking with the door slammed shut 'Cause you don't need much No, it doesn't take a lot Yeah, all you need's a touch I can work with what you got (I can work with what you got) From a spark to a fire From a wave to a hurricane Let my love take you higher Start it like the morning brakes Just a word that's all it takes A little faith (faith), just a little faith A little faith goes a long long way A little faith (faith), just a little faith

You can move, you can move You can move any mountain Nothing you, you can't do You can move any mountain

A little faith, a little faith Goes a long long way

A little faith goes a long long way

A little faith (oh, faith), just a little faith (oh, faith)

A little faith goes a long long way

A little faith (oh, faith), just a little faith (oh, faith)

A little faith goes a long long way

A little faith, just a little faith

A little faith goes a long long way
