

The Endless Fight

Breathe Electric

It's been days since I began
This endless fight of mine.
If you could see me now,
You'd be surprised.

And we are fine. (We are fine)
We are fine. (We are fine)

She walked by in the middle of the night
Just to make sure I was there.
I need closure, now I need closure.
She walked by in the middle of the night
Just to pretend she missed me.
Now I say live and let die,
Bring it all night,
This is where find out,
This is where we find out what we're made of.

And we are fine.
We are fine.
And if you go from here, you'll live through everything.
And we are fine.

If you could see me now... (you would know)
(4x)

And we are fine,
We are fine.
And we are fine.

And we are fine,
If you go from here, you'll live through anything.
And we are fine.

And we are fine,
We are fine...
