

# God Complex

Brennan Heart

Here's the situation: You're being lied to  
There is confusion but the truth is inside you  
So take a moment to lock on your vision  
Your heartbeat will guide you  
The sound is religion

The blood of creation will seep through the cracks  
The past and the future predict what is next  
So plant your transition and reap the effects  
Destroying the devil with a God complex

The blood of creation will seep through the cracks  
The past and the future predict what is next  
So plant your transition and reap the effects  
Destroying the devil with a God complex

We all believe in a higher power  
But you rely on the force of music

And the firm belief that we are always connected  
Never doubt, but always trust your faith  
And don't be mislead by ego  
'Cause that's the devil with a God complex

Here's the situation: You're being lied to  
There is confusion but the truth is inside you  
So take a moment to lock on your vision  
Your heartbeat will guide you  
The sound is religion

The blood of creation will seep through the cracks  
The past and the future predict what is next  
So plant your transition and reap the effects  
Destroying the devil with a God complex

Don't believe the devil  
The God complex
