

On The Floor

Brian McKnight

The bed gives
Cupboard might break underneath you
Hard as I try
The table might shake
Could break a leg when I do what I do
I'm all about mine

Consider the love we made
When pleasure can be found
In and all around
The right place is on the floor
Why don't we get down on the floor
I won't leave you wanting for more
If we get down on the floor
On the floor

Comfortable spot
When I get you hot
A place to lay your head
Was it Socrates who said
Good to the last drop, lady
Ooh, you're so sweet
From your head to your feet
Face is turning red
Now my appetite's there

Consider the love we made
When pleasure can be found
In and all around
The right place is on the floor
Why don't we get down on the floor
I won't leave you wanting for more
If we get down on the floor
On the floor

When you're satisfied
That's when I'll give you more
It's gonna rain, let it pour
And if you're gonna stay
And you're willing to play
It's time that we openly, honestly
Get on the floor

On the floor
On the floor
On the floor
Floor, on the floor

[repeat and fade]
