

Where We Belong

Brighten

I swear the moon don't hang 'round like it used to be
The sun from far away gets brighter every time
I got a feeling like the moon curled up right next to you
Saw the lovin' that you do and let the world unwind

We don't know just what to do with it (what to do with it)
We don't know just what to do

I like it when she sings to me
Soft like singin' with the birds and bees
You can put her right next to me
'Cause there's where we belong, my baby
You can catch her on the boulevard
Stoppin' my heart and all the passing cars
Keeping me young, puttin' life on hold
I'm singing, oh thank heaven she's so beautiful

She likes listen while I stop this tr-
Just the way we like it while it's pouring rain
And I tell by the way she moves that she don't play that game
Yeah she's mine, all mine
Can't be wasting time
Just looking at anyone else but her
She's never gonna leave my mind

She don't know what to do with it (what to do with it)
We don't know just what to do

I couldn't find the reason why
Why I should be looking at the other ones in line
I'll try to be kind
And not lose my mind
So I don't ever lose you

Oh thank heaven, she's so beautiful
