

Straight Down the Line

British Sea Power

Straight down the line with love, straight down the line with hate

I never felt so good, I never felt so great

It all looks so familiar, it's all very few willing to (sic)

Cross the military ground I am lost but I'll be found

Sunshine, gunfire, enemy I won't be getting hurt today

Fifteen miles without a break just for one more month of grace

I have said romance is dead

Created destruction in my head

But I did not know it's a soldier soaked in blood

But I never felt so good

Straight down the line with love, straight down the line with hate

I never felt so good today, I never felt so great

He made me a meal out of the scraps then he talked to a photograph

He would rather take your pain than see you get hurt this way

'Cause you can't make it alone, you can't make it alone

You can never go, you can never know

Don't go any further, don't go any further

I never knew that it could feel so good, I never knew that it could feel so good, ah

I never knew that it could feel so good, I never knew that it could feel so good, ah

'Cause a feeling I know is a soldier soaked in blood, but you never felt so good

Straight down the line with love, straight down the line with hate

I never felt so good, I never felt so great

Straight down the line straight up the field straight down the line nothing is real

Imploding come bursting, better yet the scent of death
